

## AI Learning and Future Skills: Lutech Becomes a Shareholder of POLIMI Graduate School of Management

Milan, September 1, 2026 – The corporate ecosystem of POLIMI Graduate School of Management continues to expand. Lutech, Italian leader and European player in digital and AI, has officially joined the business school's corporate shareholders, further strengthening one of the most prestigious international hubs dedicated to management education.

Lutech's involvement in POLIMI GSoM represents the natural evolution of an already well-established collaboration with academia and, in particular, with Politecnico di Milano. This relationship is also reflected in the active contribution of the company's leadership to teaching activities, as demonstrated by the role of Giuseppe Di Franco, CEO of the Lutech Group and Adjunct Professor at the School of Management. The focus is on areas that are strategic for the country's competitiveness, ranging from Artificial Intelligence to technological innovation, strengthening the dialogue between academic expertise, industrial vision, and the practical needs of businesses.

Lutech's participation among the School's corporate shareholders also marks an important step in POLIMI GSoM's growth, encouraging a continuous and mutually beneficial exchange of experiences, expertise, and perspectives. This collaboration will contribute to the co-design of master's programs and learning pathways that are increasingly aligned with real business needs, leveraging the AI learning capabilities made available by Lutech. For the Group, being part of the POLIMI GSoM ecosystem means actively contributing to the School's mission and educational direction while engaging with an international hub where academic excellence, talent, and innovation come together to generate new growth opportunities.

*"Maintaining an open, continuous, and constructive dialogue with businesses is a fundamental principle of POLIMI Graduate School of Management," said **Federico Frattini, Dean of the Politecnico di Milano Business School**. "By welcoming Lutech among our corporate shareholders, we are bringing on board a key player in the creation of the digital ecosystems that are essential for market evolution. We share the firm belief that only through education, continuous learning, and ongoing reskilling can managers acquire the tools they need to understand and master the challenges posed by ever-changing scenarios."*

**Giuseppe Di Franco, CEO of the Lutech Group**, commented: *"I firmly believe that a strong synergy between the business world and academic excellence is the primary driver of the country's competitive development. Becoming a corporate shareholder of POLIMI Graduate School of Management is both an honor and a reinforcement of our daily commitment to placing skills at the heart of our Digital Evolution offering, and particularly of BrAI Learning. Working side by side with such a prestigious institution will enable us not only to educate tomorrow's innovation leaders, but also to equip them with the ethical vision and the tools needed to build secure and sustainable innovation ecosystems. In this context, our newly appointed executives will participate in the Master in Business Management for Digital Leaders, a valuable opportunity to strengthen the business and management capabilities required to guide organizations toward an increasingly digital future."*

## **Artificial Intelligence in the Service of Education**

Lutech BrAI Learning is a solution designed to address learning needs in the AI era, created with the mission of enhancing skills through personalized learning experiences for schools, universities, businesses, and public administrations across Italy. BrAI Learning leverages next-generation AI-powered learning technologies to improve the effectiveness and efficiency of educational processes. It creates tailored learning paths for each individual, adapting both content and teaching methods to their specific needs.

Its mission is to enrich skills, starting with digital and AI competencies, by providing a personalized, effective, seamless learning experience that is connected to a wide range of educational and professional ecosystems.

### **About POLIMI GSoM**

*POLIMI Graduate School of Management is the business school of Politecnico di Milano, Italy's leading technical university, renowned for its strong heritage in technology expertise and innovation. Established nearly 50 years ago as MIP Politecnico di Milano, it is now a non-profit consortium company jointly owned by the university and a group of leading Italian and international organizations.*

*The School inspires tomorrow's leaders and the organizations they serve by delivering excellence in education and equipping learners with the skills and tools needed to address society's most pressing challenges. It offers more than 40 master's programs, including MBA and Executive MBA degrees, over 300 open-enrollment courses, and customized learning solutions for businesses. Innovation lies at the heart of its educational model, as demonstrated by its Online MBA, consistently ranked among the best in the world by major international rankings, and by the integration of digital technologies across all programs.*

*As part of the School of Management of Politecnico di Milano, POLIMI GSoM is one of the few business schools worldwide to hold the prestigious Triple Crown of international accreditations. With a community of more than 15,000 alumni and 3,000 students each year, it represents a dynamic, entrepreneurial, and innovation-driven ecosystem.*

*Sustainability is a core value for the School, which is actively committed to building a more equitable, inclusive, and responsible future through initiatives and projects with significant social impact. In 2020, it became the first business school in Europe to achieve B Corp certification. Since 2023, it has operated as a Benefit Corporation, further strengthening its commitment to generating a positive impact on society and the environment.*
